To Whom It May Concern:

This letter is to verify that the Enphase Micro-inverter System is qualified equipment for California's CSI EPBB program.

The Enphase meter is a qualified +/- 5% or better meter, as can be verified by looking at the CSI's list of qualified meters at:

<http://www.gosolarcalifornia.org/equipment/meter.php>

Please note that the Enphase Micro-inverter has a separate meter display (i.e., not built into the inverter itself). The Enphase meter display is the Envoy/EMU Communications Gateway. As long as the Envoy unit is included in the deployment of the Enphase solar installation, the system fulfills the meter requirements to qualify for the CSI EPBB program.

For further details about the Enphase Micro-inverter System, please visit the Enphase website at <http://www.enphaseenergy.com> or contact Customer Support at support@enphaseenergy.com or via phone at 877.797.4743.

Thank you.

The Enphase Energy Team
